SKILLS

WORK EXPERIENCE

Senior Software Engineer

Pirimid Technologies Pvt. Ltd.

04/2023 - Present

Ahmedabad, Gujarat

Achievements/Tasks

- Spearheaded the development of digital investment platforms for commodities like Gold. Architected robust system infrastructures using Java, Spring Boot, and AWS with microservices, creating advanced parallel asynchronous payment processors that reduced transaction processing time from days to under an hour while ensuring exceptional performance and reliability.
- Directed the transition from a monolithic to a multi-tenant architecture by re-architecting the system into a microservices framework using Java and Spring Boot alongside optimizing AWS costs. Implemented PostgreSQL database sharding for scalability and future client onboarding, ensuring data security and regulatory compliance throughout the architecture implementation.
- Developed the user interface for a portfolio analyzer proof of concept (POC), creating essential features such as login, dashboard, and signup utilities from scratch.
- Directed the development of a KYC document management system, utilizing AWS Cloud solutions to ensure secure storage and management of sensitive customer data.
- Led the development of backend services for Buyer and Seller applications, ensuring compliance with ONDC Network specifications. Represented the company in network interactions and led the technical efforts.
- Collaborated with the business development team to propose designs and architectures for new projects, estimated project timelines, and provided insights on resource allocation.
- Pioneered the exploration of new initiatives by developing Generative AI chatbot Proof of Concepts (POCs) using LangChain and OpenAI.

Senior Software Engineer

Musikaar

09/2021 - 04/2023

Ahmedabad, Gujarat

Achievements/Tasks

- Led a cross-functional team of backend and frontend developers, and QE experts to successfully deliver 3 major architectures and over 10 REST-based integrations.
- Progressed from Developer to Backend Lead, Team Lead, and ultimately Product Owner, showcasing versatility and leadership while consistently contributing to business growth.
- Partnered with the CEO to engage clients and design effective product architectures, aligning technical solutions with business objectives and securing new business opportunities.
- Leveraged expertise in Java, Groovy, Kotlin, Microservices architecture, and database platforms like DynamoDB and PostgreSQL, along with AWS Cloud Technologies, to deliver a wide range of features across diverse technology stacks.
- Mentored team members at all levels, fostering professional development and maintaining high standards of quality.
- Actively participated in company-wide initiatives, including training new joiners and collaborating with HR to streamline the hiring process.

WORK EXPERIENCE

Senior Applications Engineer

Oracle

06/2019 - 07/2021

Gandhinagar, Gujarat

Achievements/Tasks

- Expertly managed Oracle HCM recruiting module lifecycle, from initial development to bug tracking and resolution oversight.
- Spearheaded the creation and deployment of essential enterprise utility tools, including an Automated Java UI Generator, Database Optimization and Maintenance Tools, and Advanced Reporting Data Extraction Tools, contributing to operational efficiency.
- Led a team in seamlessly migrating 5+ customer environments from legacy systems to modernized database models, ensuring uninterrupted operations and enhanced performance, while effectively managing client expectations.
- Offered strategic guidance and mentorship to cross-functional teams, promoting career development and ensuring effective knowledge sharing.

Software Engineer

Musikaar

06/2018 - 06/2019

Ahmedabad, Gujarat

Achievements/Tasks

- Engineered and managed a Python-based automated data generation framework for **CrowdStrike**, significantly enhancing their product's machine learning models for advanced threat detection in cybersecurity.
- Upgraded system capabilities by integrating advanced sorting and filtering mechanisms, achieving substantial improvements in memory efficiency and cost savings.
- Achieved a **4x increase** in framework performance and accuracy, leading to a notable reduction in false positive rates across threat detection algorithms. This achievement was recognized by Musikaar, **CrowdStrike**, and their clients.
- Conducted comprehensive training sessions on the framework and facilitated the onboarding of new team members and developers to the project.

Software Engineer

AppPerfect Corporations

04/2017 - 04/2018

Udaipur, Rajasthan

Achievements/Tasks

- Spearheaded the design and implementation of a robust Java-based backend framework from scratch, leading a team in delivering a multi-threaded data integration system with a configurable JSON parser. Leveraged Java with Maven and Cassandra, ensuring scalability and performance optimization.
- Pioneered Salesforce Integration. Initiated and successfully integrated Salesforce services within the company, becoming the first to achieve this milestone. Completed 2 levels of Salesforce certifications, enabling the company to showcase expertise and win new business opportunities.
- Conducted in-depth training sessions for teams in both India and the US, elevating organizational expertise in Java and Salesforce technologies.

ACHIEVEMENTS

Cleared Google Interviews

Offered a role of Application Engineer after clearing all Google interviews.

Leading Since the Start

Led a team and developed a multithreaded scalable framework in the first year of my career.

Business Expansion and Innovation

Initiated business growth outside the domain, embracing new technologies like Salesforce, Generative AI.

Percentile score of 99.30 in JEE Mains 2013

Secured a percentile score of 99.30 in Joint Entrance Examination - Mains 2013.
